Abstract of WO0162458

Process to prepare cement mixes for immediate use, in the production of concrete mixes or other articles, or as grouting mixes for injections, which provides for the wet-milling with water of the solid components of said mixes, the ratio between water and said solid components varying from 0.2 to 0.8, and preferably from 0.28 to 0.60. The invention also concerns the production of concrete mixes or other articles, and of grouting mixes for injections in the works of consideration and/or impermeabilization of soils, particularly concrete, obtained starting from said mixes.
